

# Shrivers Pharmacy now offers... **compounding** medications for **animals**

Why **compounding** is the right solution.

*Because treatment is as unique as each animal.*

Compounding is the art and science of preparing personalized medications for feline, canine, and equine applications. Compounded medications are made based on a veterinarian prescription in which individual ingredients are mixed together in the exact strength and dosage form required by the animal. This method allows the compounding pharmacist to work with the animal and the veterinarian to customize a medication to meet the animal's specific needs.

Shrivers Pharmacy personalizes medicine for veterinarians who are looking for:

- Custom strengths
- Medications to minimize side effects
- Custom dosage forms
- Time sensitive, measurable and identifiable results
- Over 100 flavor offerings

Here are a few of the special features offered by Shriver's Compounding Lab that are specifically designed for animal applications:

- The Dial-A-Dose Syringe
- Poloxamer Gel
- Vapor-Flex Flat Barrier Bags
- Self-sealing Stay-Safe™ Closures on syringes
- PCCA's AccuPen™-15
- PCCA Lipoderm®
- Collapsible bottle medical applicators

Shrivers Pharmacy certifications, accreditations, and memberships
