Why **compounding** is the right solution.

Because it's Personal

Compounding is the art and science of preparing personalized medications for patients. Compounded medications are made based on a practitioners prescription in which individual ingredients are mixed together in the exact strength and dosage form required by the patient. This method allows the compounding pharmacist to work with the patient and the prescriber to customize a medication to meet the patient's specific needs.

Shrivers Pharmacy personalizes medicine for patients who are looking for:

- Custom strengths
- Medications to minimize side effects
- Custom dosage forms
- Time sensitive, measurable and identifiable results
- Over 100 flavor offerings
