Zanesville, Ohio January 14, 2021

Southeast Ohio independent pharmacy chain Shrivers Pharmacy and Shrivers Pharmacy and Wellness has been chosen by the State of Ohio as an initial pharmacy partner to help administer COVID-19 vaccines. Shrivers Pharmacy has 7 pharmacies throughout southeast Ohio. Shrivers Pharmacy is also announcing a website-based registration and scheduling process for those who want to receive the vaccine.

"Our stores and pharmacies have played a very important role in supporting their communities during this difficult time," Shrivers Pharmacy Owner & CEO John Coler said. "We are proud to be chosen by the State of Ohio as a partner to help administer these critical vaccines and we look forward to our expanded role in helping communities throughout southeast Ohio defeat this pandemic."

With this announcement, Shrivers Pharmacy has been selected by the State of Ohio to directly receive and administer COVID-19 vaccines under the Federal Retail Pharmacy Partnership Program. Shrivers Pharmacy will administer the first and second doses of COVID-19 vaccine for all of their seven locations to patients 80 and older beginning January 21st. Specific Vaccination Clinic locations have not been finalized, but will be released as soon as this information becomes available. This information will be available online at www.shriverspharmacy.com

As more doses become available, Shrivers Pharmacy will expand COVID-19 vaccine administration by adding more Vaccination Clinic Events in communities where their stores are located. Those who wish to register for the vaccine can do so online at www.shriverspharmacy.com. The form must be completed entirely to be registered. Patients should bring insurance card and driver's license with them to their scheduled vaccination appointment and be prepared to follow COVID-19 Orders by wearing a mask, and properly social distancing 6ft apart. Also, patients should arrive no more than 5 minutes before their scheduled time. Online registration begins Monday January 18, 2021.

In late 2020, the U.S. Department of Health and Human Services (HHS) Announced the US Government partnership with numerous pharmacies, such as Shrivers Pharmacy. Pharmacists, pharmacy interns, and pharmacy technicians routinely provide vaccinations in retail and grocery stores. Therefore, the federal government has recognized pharmacy vaccinators as crucial public health partners for increasing access and convenience of COVID-19 vaccines.

About Shrivers Pharmacy: Shrivers Pharmacy is Southeast Ohio, based independent Pharmacy Chain that operates 7 Pharmacies throughout 6 Ohio counties. A privately-owned and operated company since 1979, Shrivers Pharmacy is dedicated to patient care and going the extra mile to meet the unique needs of the communities they serve.
